

Where we are

Almost finished A3 grading (checking missing ones & Slack days)

Final project proposals: all graded (detailed feedback in two weeks)

Three more lectures by me

One more D3 lab and one R lab

Your final projects

Final project milestone: **April 30** (or **May 7** if the class prefers).

(Note: if you haven't attended lectures, at least review lecture slides)

User Interface

CMSC471: Introduction to Information Visualization

Fumeng Yang, Assistant Professor

April 15, 2025

University of Maryland, College Park

<https://fumeng-yang.github.io/CMSC471>

Your assignment submissions remind me of...

**The worst volume control UI
in the world**

UI design is (probably) **not** the
most important thing for a web
but **quite** important

UI Design

The **art** and **science** of designing user interfaces for digital products

Enhance usability, accessibility, and user satisfaction

Direct influence on user experience and business outcomes

Core UI Design Principles

Usability: Make interfaces easy to use

Consistency: Maintain uniform elements across the interface

Feedback: Provide clear responses to user actions

Hierarchy: Guide the user's attention to what matters most

Clarity: Ensure information is presented clearly

Accessibility: Design for users of all abilities

Bad alignment
